

# Mama's Printing Tips

Important: You must use Printing Templates from [mamaspricelessparties.com](http://mamaspricelessparties.com)

## Home Printing

Make sure that you have enough coloured ink. If not, your colours may not print properly

## Using a Printshop

For great colour quality, I use a printshop, such as Staples. Submit files electronically to save time

## Save Money at Printshop

Avoid same day pick up or print in self-serve area. Call your local printshop for options & best pricing

## Library Printing

Some libraries have great quality printers. Check with your local library for options and pricing.

## Use a Paper Cutter

It gives the straightest cuts, which make your project look more professional. Printshops usually have them in their self-serve area
